

Feedback form: Neven Point Wind Farm

Thank you for taking the time to attend our November 2024 public drop-in exhibition event for the revised design of our Neven Point Wind Farm proposal and/or for looking at the exhibition information on our project website at www.greenpowerinternational.com/current-projects/neven-point-wind-farm/.

This event is the first of two public consultations that we will be holding. The second consultation event, which will present the final design, will be held (and advertised) early in 2025.

Please use this form to provide any feedback that you may have on the proposal at this stage and: hand it in at the exhibition; return it by post to Neven Point Wind Farm, GreenPower, The e-Centre, Cooperage Way, Alloa, FK10 3LP; or, email it to nevenpoint@greenpowerinternational.com. **The closing date for feedback is Wednesday 4th December** - this ensures that all feedback received by this date is considered at this stage of the pre-application process.

Please note that written comments submitted to GreenPower at this stage are not representations to the determining authority (Orkney Islands Council). There will be an opportunity to submit written representations to the determining authority once a planning application has been submitted and a statutory consultation initiated.

This event

1. How did you find out about this consultation? (please tick your answer)

Letter through the door Newspaper advert Newspaper notice

Other (please specify).....

2. Where did you view the exhibition information? (please tick your answer)

Attended exhibition event Viewed project website Both

3. Do you have any other comments regarding this event?

Renewables

4. Do you think harnessing renewable energy is important in the effort to secure clean affordable energy sources and address climate change? (please tick your answer)

Yes No Unsure

5. Do you feel that Eday should harness its rich renewable energy resources to benefit both the community here and to help tackle climate change? (please tick your answer)

Yes No Unsure

The revised design

6. In your opinion, is the 'revised design' an improvement on the original (June 2022) 6-turbine layout?
(please view the 'Design evolution' board for further context) (please tick your answer)

Yes No Unsure

7. What do you think of the layout generally? (please tick your answer)

I am happy with it I'm neutral towards it I have concerns about it

8. Do you have any specific comments or questions regarding the 'revised design'?

Local benefits

GreenPower is committed to providing £5,000 (or equivalent) per MW of installed generating capacity to the community every year in community benefit from the project. If a 30 MW project was consented, this could see £150,000 per annum invested into the local community.

The benefits from the project will be shaped in response to community feedback and administered openly and transparently (the community will be consulted further on this should the project receive consent).

There are lots of projects and priorities that community benefit can support as well as several ways that community benefit can be delivered (please see the 'Community benefit' board for more details) and we are interested in your views on this as it will ultimately be community led.

- 9. Should the project go ahead, what sort of community benefits would you like to see the project support?** (for example, some suggestions that we have received so far include - a local energy discount scheme for permanent residents, an energy efficiency/fuel poverty programme for homes, support for local social enterprises, training and apprenticeships, improved transport connections, enhanced tourism infrastructure, upgraded broadband, etc. Please tell us what you think the priorities should be).

- 10. Do you have any views on how you would like to see the funds managed and administered?**

- 11. If the Neven Point Wind Farm goes ahead, do you think the community and/or individuals should be given the opportunity to own a stake in the project, in addition to the proposed community benefit fund?**

Yes No Unsure (please tick your answer)

Please expand on your answer and detail any opportunities or concerns associated with this opportunity:

Maximising local investment

It is important to GreenPower that we involve local businesses as much as possible with our projects, to maximise community wealth building opportunities and growth potential for businesses on Eday and within the wider Orkney Isles.

- 12. Are you aware of any local businesses with relevant skills, services or materials that may wish to get involved in the project?** (please see the 'Delivering meaningful benefits' board for more details of the sorts of skills, services and materials that the project is likely to require).

- 13. Is there anything else on Eday that you think the project could do, or contribute to, during construction?**

***Should you have further comments, please provide these on a separate sheet along with your feedback form.**
